

Sansin's Zero-VOC Interior Penetrating Wood Stain

Sansin Corp. has released its new Purity Interior Zero VOC Penetrating Stain, the first water-based interior wood stain with a base free from any harmful volatile organic compounds (VOCs) that penetrates both soft and hard woods with consistent, uniform coverage.

With Purity Interior Zero VOC stain, customers can apply the stain directly to any wood without purchasing and applying wood conditioners, requiring less stain to deliver vibrant and even wood saturation with little to no odor and zero VOCs.

eXact Color™ Sealant From Sashco

Sashco introduces eXact Color™ Sealant, the first fast and easy way to create custom color sealants to

match any job or to create beautiful contrasts. eXact Color™ Sealant requires no special tools or mixers; it's simple to mix in just three minutes using your latex paint, water-based solid stain or universal pigments.

eXact Color™ Sealant is an easy to color, apply and clean, water-based caulk that provides excellent adhesion and extreme elasticity so it won't crack or tear.

With unlimited color possibilities your customers can unleash their inner artist and take their design project to the next level.

eXact Color™ Sealant is not only useful when you want a perfect color match, but works beautifully to highlight an architectural feature with a contrasting color caulk.

Wooster Dust Eater™

The Wooster Dust Eater™ has been devouring all the drywall dust, sawdust, cobwebs and pet hair it could find in the two years since its introduction. Many people have found that the more they use this tool's specially treated yarn, the better it seems to work. But some contractors have been heavily using their original Dust Eater for all that time, so they're asking when a refill will be available. The answer is today.

Trilingual packaging

includes simple instructions for attaching the replacement head to the 16-inch fiberglass-reinforced nylon base. The triangular shape reaches into corners and covers large surfaces like walls, ceilings, baseboards and floors without concerns of flipping or gouging. It pivots up to 360 degrees and cleans with powerful, long-lasting pickup, no wetting or washing required.

Safe-T-Shade™ From Stevenson Vestal

Safe-T-Shade™ is a patent-pending, industry-first design that enables all styles of shades to function smoothly and freely without entangling lift cords, control cords and unsightly rings. The system was developed in anticipation of a massive voluntary recall jointly announced in December, 2009 by the U.S. Consumer Product Safety Commission (CPSC) and the Window Covering Safety Council (WCSC), affecting millions

of Roman shades and roll-up blinds.

Stevenson Vestal, a custom window fashions manufacturer, has introduced the Safe-T-Shade™, which is a dramatic innovation in lift and operating systems for Roman, woven wood, screen and roller shades that completely eliminates hazardous cords.

The Safe-T-Shade™ also eliminates the clutter of exposed hardware, resulting in a clean, tailored look, even from exterior views.
