

Sansin 2-Coat DEC™ Stain

Issue: Issue 253

Posted Date: 7/13/2010

Sansin's [2-Coat DEC™](#) is a [wood](#) stain with modified natural oils and a waterborne formulation that uses water, not oil, to deliver stain color deep into deck [wood](#), repelling water but not inhibiting evaporation. The water repellency from rain and protection from UV exposure allow the [wood](#) to adjust naturally to moisture levels in the environment, reducing maintenance and adding protection to the deck wood. Sansin's 2-Coat DEC stain comes in 79 different colors and is designed for application to new or old cedar, pine, spruce, fir, pressure-treated lumber or exotic hard woods. Pricing varies, with natural color stain at a U.S. price of \$51.86 for a gallon-size container, and \$241.18 for a five-gallon size.
