Walking Mountains Science Center Wins 2012 Responsible Development Award from *Mountain Living Magazine*

--Walking Mountains Science Center used custom, low-VOC water-borne wood stain developed by [Sansin Corporation](#) and [Vintage Woods](#)--

Strathroy, Ontario, Canada, July 19, 2012 - The Walking Mountains Science Center was recently awarded the 2012 Responsible Development Award in the tourism category from [Mountain Living magazine](#). Each year the magazine awards top achievers in sustainable development for projects located in the high country of the Rocky Mountains.

Walking Mountains Science Center, located in Avon, Colo., opened its doors to the public in August 2011, showcasing the use of local beetle-killed pine for its exterior.

To protect and beautify this special pine, the design firm - Zehren & Associates - selected a custom Sansin stain that would be UV resistant, water repellent, rot resistant, and allow the beauty of the beetle-killed pine wood and its color variation to stand out.

SANSIN®

About Sansin

For 25 years, Sansin has been the only wood protection company focused exclusively on researching, developing, and introducing environmentally-friendly, 'water-borne' interior and exterior wood products and technologies that deliver outstanding color, durability and performance without the toxicity found in conventional stains. Sansin Enviro Stains use water, not oil, to deeply penetrate and protect wood naturally, from within. Headquartered in Ontario, Canada, Sansin has dealer locations across Canada and in the U.S. To learn more about The Sansin Corporation, its line of Enviro Stains or how to become a Sansin preferred dealer, visit www.sansin.com.
