**DeVaul Paint Company Debuts Sansin Line of High Performance,
Low VOC Wood Finishing Products**

Strathroy, Ontario, Canada, September 20, 2010 - The Sansin Corporation (www.sansin.com) today announced that DeVaul Paint Company, based in Santa Ana, CA (www.devaulpaint.com), which has been in business since 1952, will offer its line of interior and exterior environmentally friendly wood coatings and sealants. Sansin products meet what's considered the nation's strictest air quality regulations issued by the Southern California Air Quality Management District for architectural coatings.

"The Sansin line of products appealed to us since we have contractors and consumers wanting premium products for their high end wood finishing projects," said Jack Greenwood, Owner of DeVaul Paint Co. "Not only does Sansin come in well below the area's strict VOC regulations, but it shows that an environmentally friendly product doesn't have to compromise on performance and beauty."

DeVaul's will carry Sansin's line of Enviro Stain exterior wood stains, cleaners and sealants (DEC™, Classic™, ENS™ SDF™); Purity Interior stains, gels and clears; and an inorganic, water-diffusible treatment used to fight fungi and insect infestations at its location on S. Harbor Boulevard in Santa Ana.

"As an independent retailer that is truly part of the local community, DeVaul's offers a high level of personalized customer service that is so important for successful wood finishing inside or out. Our company is dedicated to showing homeowners and builders that you can achieve a lasting, beautiful wood finish without the toxicity found in conventional stains," said Sjoerd Bos, Vice President of the Sansin Corporation.

About Sansin

For 25 years, Sansin has been the only wood protection company focused exclusively on researching, developing, and introducing environmentally friendly, 'water-borne' interior and exterior wood products and technologies. Sansin's products deliver outstanding color, durability and performance, without the toxicity found in conventional stains. Sansin Enviro Stains use water, not petroleum solvents, to deeply penetrate and protect wood naturally, from within. Sansin has dealer networks in both Canada and the U.S. To learn more about Sansin Corporation, its line of Enviro Stains or how to become a Sansin preferred dealer, visit www.Sansin.com.
