

WOOD

The warm beauty of wood enriches our lives. Its natural charm inspires the imagination and its rich texture rewards the touch. But wood is organic – it needs to be protected. In nature, trees are protected with bark. Now you can protect just as naturally with Sansin Enviro Stain.

THE NATURAL BEAUTY of

IF YOU CAN IMAGINE IT, WE CAN CREATE IT

Why build with wood in the first place? The answer is simple: beauty and durability. At Sansin we feel no other building material even comes close to the natural warmth, character and versatility of wood. Wood is our only natural renewable resource and every piece is unique. With over a hundred colors to choose from, plus a range of transparency, lustre and finish options, the color possibilities of Sansin Enviro Stains are literally unlimited. From low-lustre natural to solid-hide gloss, our wood coatings are renowned for their purity of color and their exceptional UV and fade-resistant qualities.

To achieve this, we've harnessed the power of nano technology to create color like you've never seen before. An innovative process micronizes the highest quality pigments into tiny particles so incredibly fine – measured in a billionth of a meter – that they combine with the protective oils and resins in Sansin Enviro Stains on a molecular level. Once applied to your home or deck, Sansin's penetrating stains carry the pigmentation into the wood for uniform color that is so vibrant and long-lasting it has to be seen to be truly appreciated.

THE SECRET TO BEAUTIFUL COLOR

We've harnessed the power of nanotechnology - particles less than one billionth of a meter across - to create color like you've never seen before. An innovative process atomizes only the highest quality pigments into tiny particles that are so incredibly fine they combine with the protective oils and

resins in Sansin Purity Interior Stains and Clears on a molecular level. Once applied to your home, they penetrate deeply, pulling the pigmentation down into the wood for uniform color that is so vibrant and crisp it has to be seen to be believed – not to mention longer-lasting color performance.

WHY HIDE THE PERSONALITY OF YOUR WOOD?

Sansin Enviro Stains let the personality of your wood shine through. Where many traditional stains and coatings put a layer between you and your wood, Sansin penetrates deeply, bonding directly

with individual wood cells for maximum protection. If you plan on using a naturally beautiful material like wood, why would you cover it up?

TOUGH *is* BEAUTIFUL

THE RIGHT CHOICE FOR YOUR WOOD

The warm beauty of wood has inspired humanity since the beginning of time. From the elegance of traditional Scandinavian full scribed log homes, to Europe's post-modern construction, to the weathered charm

of the East Coast's seaside homes – wood defines and shapes their unique character. The grain and knots in wood, like the lines of our own faces, express its inherent character and personality.

INSPIRED BY NATURE

With over 125 choices – including our interior color line-up – you can be sure of finding a color to suit your every project. For inspiration, our designers simply turned to the everyday miracles of the natural world: the wild beauty of a sea-swept beach, the brilliant hues

of a northern sky, and the natural and expressive tones of wood itself, are among the many colors you can bring to your wood. And should you have a color in mind that isn't available in our collection, our custom mixing program lets you bring it to life.
