

WOOD

The warm beauty of wood enriches our lives. Its natural charm inspires the imagination and its rich texture rewards the touch. But wood is organic – it needs to be protected. In nature, trees are protected with bark.

Now you can protect just as naturally with Sansin Enviro Stain.

THE NATURAL BEAUTY *of*

## CHOOSE THE PERFECT FINISH

Whether you want to enhance the natural warmth of wood or a crystal-clear finish for light, white and gray tones, we have the penetrating stain, gel, lustrous oil or clear topcoat that's perfect for your project.

## PREPARE THE WOOD SURFACE

Carefully select the right sandpaper and tools, and always sand with the grain for best results. Remove dust particles by vacuuming and wipe with damp cloth and test product on an inconspicuous wood surface to validate technique and ensure proper color and penetration.

## FOLLOW APPLICATION BEST PRACTICES

Apply Purity Interior Stain by sprayer, China bristle brush, or a pad applicator. For Purity topcoats, use a sprayer, nylon polyester brush or a pad applicator. Always spread the finish evenly. Sand lightly between coats, if necessary. Before starting your project, carefully consult the product data sheet and label for complete directions.

## THE SECRET TO BEAUTIFUL COLOR

We've harnessed the power of nanotechnology - particles less than one billionth of a meter across - to create color like you've never seen before. An innovative process atomizes only the highest quality pigments into tiny particles that are so incredibly fine they combine with the protective oils and

resins in Sansin Purity Interior Stains and Clears on a molecular level. Once applied to your home, they penetrate deeply, pulling the pigmentation down into the wood for uniform color that is so vibrant and crisp it has to be seen to be believed – not to mention longer-lasting color performance.

## WHY HIDE THE PERSONALITY OF YOUR WOOD?

Sansin Enviro Stains let the personality of your wood shine through. Where many traditional stains and coatings put a layer between you and your wood, Sansin penetrates deeply, bonding directly

with individual wood cells for maximum protection. If you plan on using a naturally beautiful material like wood, why would you cover it up?

## BEAUTY THAT GOES BELOW THE SURFACE

Sansin Enviro Stains have modified natural oils and resins that carry deep into the wood's cell structure using one of nature's commonplace miracles – water. As the water evaporates, Sansin bonds directly with the wood, forming a tough, durable barrier that won't crack or peel.

The idea of protecting wood with nature's own ingredients is almost as old as wood itself. More than a thousand years ago, the ancient peoples of Norway took resin and gums from the heartwood of trees, warmed it and applied it to their Stave Churches with a broom.

Those buildings are still standing. Sansin Enviro Stains are created using the same principle. With Sansin Enviro Stains, not only can you protect your wood naturally – you also invite the beauty of nature into your life.

Our unique formulas offer every level of finish – from penetrating natural stains, to high-gloss, film-build coatings. Match the look of your Enviro Stain with the protection your project needs. No matter what Sansin Enviro Stain you choose, you can count on exceptional beauty and performance. And they're not harmful to the environment.

Purity Glacier or Purity Floor can be tinted to a variety of standard and custom solid colors.

SOLIDS

SANSIN PURITY INTERIOR

Enhance the natural warmth of your home with Sansin Purity Interiors. Designed to the exacting standards of master joiners and architects, Sansin Purity is known for extraordinary beauty and clarity of color. A wide range of stains, finishes and oils offer durable protection against staining, dirt, odors and general wear and tear.

PURITY STAIN

RICH, UNIFORM COLOR – AND ULTRA LOW VOC’S

Purity Interior Stain is designed to penetrate deep into wood for lasting color and durable protection. Specially formulated for brush or spray application to deliver unparalleled beauty, Purity Interior Stain will transform your home interior with defined grain and rich color.

PURITY GEL STAIN

COLOR CONTROL WITH LONGER OPEN TIME

Purity Interior Gel Stain offers all the protection and beauty of Purity Interior Stain – but doesn’t penetrate as fast, giving the applicator additional working time and the ability to “wipe” for additional color control.

PURITY NATURE’S OIL

THE WARMTH OF HAND-RUBBED WOOD

For a natural finish, use Nature’s Oil inside your home. There’s nothing warmer or more inviting than the feeling of hand-rubbed wood. Simply apply and polish this penetrating oil into wood – just one coat delivers a rich, uniform lustre that allows the grain and character of your wood to shine through.

PURITY CLEAR

ENHANCE THE BEAUTY OF YOUR WOOD

A two-coat, high solids finish that enhances the natural warmth of wood and intensifies the grain - especially suited for light-colored woods, like pine and cedar, where a mellow tone is desirable. A popular choice for log and timbers.

PURITY GLACIER

LET THE CHARACTER OF WOOD SHINE THROUGH

A crystal-clear, tough finish for high-wear interior wood surfaces like cabinetry, shelves, doors, furniture and even floors. Purity Interior Glacier will protect your wood, define it’s beauty and help to add dimension. For an exceptionally durable, long-lasting color choose a Purity Glacier solid color formula.

PURITY FLOOR

A STANDARD IN FLOOR PROTECTION

Purity Floor is a tough but flexible finish that highlights the natural tones and character of your wood floors. Floor is the ultimate in beauty and protection with superb leveling and flow. Choose a Purity Floor solid color formula to bring a long-lasting, pop of color to any flooring project.

PURITY CLEAR GLOSS 3100

PURITY GLACIER GLOSS 3000

PURITY FLOOR GLOSS 3605

INTERIOR FIRE RETARDANT FINISHES

FireStop products provide “Class A” flame spread protection that conforms to ASTM E84 and Canadian Standard CAN/ULC S-102-10. They are designed to intumesce in the presence of heat, creating a thick charred heat-insulating foamy layer.

FIRESTOP 97

CLASS A PROTECTION IN ONE COAT

FireStop97 is a solid color finish that offers excellent adhesion to wood and other surfaces. Durable and protective finish that is low-VOC, fast drying and available in white, pastel or light colored tones.

FIRESTOP 99

CLEAR WOOD TONED FIRE PROTECTION

Beautiful two-coat interior finish available in clear or ten pre-tinted colors. FireStop99 has excellent adhesion, is low-VOC, and offers simple soap and water clean-up.

SUGAR CANE FS-07

SHORE STONE FS-06

TAWNY SUEDE FS-09

FireStop 99 is available in 10 pre-tinted colors. See [www.sansin.com](http://www.sansin.com) for colors.
