

C-TEC™ ENVIRO-STAIN®

The natural choice for fiber-cement siding.

For millions of homeowners, fiber-cement siding combines the charm of wood with the durability and low-maintenance associated with fiber-cement. Now Sansin C-Tec™ makes fiber-cement siding more environmentally-friendly, with low VOC formulas for lasting protection and incredibly rich color. Your customers can rest easy knowing that not only will their home have the best in protection, it will look beautiful for years to come.

ENVIRO STAIN®

COLOR THAT LASTS

We've harnessed the power of nanotechnology – particles so tiny they are less than one billionth of a meter across – to create color like you've never seen before. An innovative process atomizes only the highest quality pigments into tiny particles that are so incredibly fine they combine with the protective oils and resins in Sansin C-Tec on a molecular level. Once applied to fiber-cement siding, they bond to the substrate for consistent color that is so vibrant and crisp it has to be seen to be believed – not to mention longer-lasting color performance.

New technology and designs have made fiber-cement siding look ever more realistic and sophisticated. Now with Sansin's advanced NanoTints™ color technology, you can add the warmth and color of wood to your fibre-cement siding with Sansin C-Tec.

The warmth of wood – in fibre-cement

ENVIRO-FRIENDLY PROTECTION THAT LASTS

Like all Sansin Enviro Stains, Sansin is formulated to be environmentally-friendly with exceptionally low VOCs. And because it bonds molecularly

Low in VOCs and enviro-friendly

C-TEC® ENVIRO-STAIN

with fiber-cement substrates, it's highly resistant to dirt and to surface marring – which means your siding will be easier to transport and install. C-Tec also enhances the natural water-repellent characteristics of fiber-cement siding and protects against UV degradation. Sansin C-Tec's high-solids formulation can be applied in only two coats for maximum beauty and protection with a minimum of factory application.

High solids for easy factory application

THE C-TEC COLOR PALETTE

Sansin C-Tec is available in 17 beautiful standard colors – and should you have a color in mind that isn't available in our collection, our custom mixing program lets you bring it to life.
